Articles

Accelerated testing to determine compliance	12:16	Concrete LNG tanker is a new concept	11:22	Gunite—surface effects with Half-castella composite beams construction	3:14
Airships—Up and away for weightlifters		A concrete message to China	5:14	Hollow concrete floors	9:34
Alkali-aggregate reactions and the Middle East		CS Annual Convention	9:14	Interlocking paving—the functional and aesthetic advantages	8:28
Almondale Centre, Livingston—Offices—design for a precast column connection	11:14	The Concrete Society Award 1976 Complex 76	6:33	Life and death of the Economic Building Corporation	2:26
Ashford—rope finish	8:36	CP114 and 110—safety in shear	4:35	London, concrete's battle for London's Muslim mosque	4:14
Association of Concrete Technologists	12:27	Cracking and the middle east	10:31	Men of good practice	10:28
At one fell stroke	9:18	Cranes and construction : economics, usage and choice	2:14	Middle East	9:14
Australasia and all that	10:26	Culverts, standard box	11:29	Alkali-aggregate reactions and the Middle East	3:25
Behaviour of non-loadbearing block walls under windloading	9:27	Deformable expanded-polystyrene concrete for tunnel segment joints	8:32	Cracking in the Middle East	1:18
Bermuda—reinforced concrete in A bridge for £479	8:29	Demolition—At one fell stroke	1:28	A plain man's guide to the Middle East	2:14
Bridge in the trees	4:24	Design charts for reinforced concrete corbels	9:18	Mosque, London's Muslim	9:20
Calstock Viaduct—an elegant lost cause	3:16	Design for a precast column connection	11:14	Mural, Sawing a giant concrete	9:14
The case of concrete coasters	11:18	Dolosse at Tristan da Cunha	4:19	The mystery of the Marquis	8:39
Century-old concrete house at Caterham	8:17	Dover, a double at	10:14	The mystery of Pendley Manor	12:21
Charter House—rope finish at Ashford	8:36	Explosive testing of fibre-reinforced cement composites	11:14	The need to communicate with the Government	12:21
Coasters, concrete—the case of COD concrete	8:17	The FCS and its aims	4:28	Night lighting of concrete	5:32
Compacting factor: a new test	6:18	Finish, rope, at Ashford	5:33	Non-loadbearing block walls: behaviour of under windloading	6:20
Composite beam construction—Half-castella	5:27	Finishes—Concrete to catch the eye	8:36	Organisation of the precast concrete industry	9:27
Composite reinforced concrete	9:34	Fire damage: Some aids to the assessment of	12:26	Ouse, Gentle curves span the	5:32
Compression machines—the technology of	8:23	Flexural testing of fibre-reinforced cement paste beams	1:14	Paving—the functional and aesthetic advantages (interlocking)	2:22
Concrete's battle for London, 1867-1886	10:23	Floors, Concrete—hollow	6:32	PCI Awards	2:26
Concrete to catch the eye	10:28	Follies in concrete	8:28	Pendley Manor—the mystery of	12:22
Concrete houses for Jamaica	12:26	The flow that fills	2:20	A plain man's guide to cracking in the Middle East	12:21
Concrete on the Liskeard bypass	2:36	Formwork, plywood and efficiency	12:14	Precast column connection, Design for	9:20
	5:22	RN Four retires	2:32	Prestressed barge—World's largest	11:14
		François Hennebique—the 'ferro-concrete' man	4:33	Prestressed concrete in India	6:17
		Gardens on concrete slabs	5:18	Prestressed and reinforced beams—the strengthening of	3:28
		Gentle curves span the Ouse	6:14		12:28
		Glimpse of another world	2:22		
		Gunite structures	5:14		
			7:16		

Putting the bridge in the picture	7:26	Brown, J. H.: Deformable expanded-polystyrene concrete for tunnel segment joints	1:28	Regan, Paul: Safety in shear: CP114 and 110	10:31
Ready mixed by the bag	3:37	Burden, Jeanette: Night lighting of concrete	6:20	Ryan, Tim: Surface effects with gunite	3:14
Rectangular columns to CP110	7:29	Butler, Maureen: A softer sell for concrete	8:38	Gunite structures	7:16
Reinforced concrete, composite	8:23	Claxton, F. B.: Dolosse at Tristan da Cunha	4:19	Schofield, Graham: Interlocking paving—the functional and aesthetic advantages	2:26
Reinforced concrete in Bermuda	8:29	Collis, Laurence: Cracking in the Middle East	2:14	Sharpe, D. J.: Standard box culverts	8:32
Reinforced and prestressed beams—strengthening of	12:28	Cusack, Patricia: A reprieve for Weaver's Mill	3:20	Sherriff, Tom: Role of the ACT	12:27
Repair of damaged reinforced concrete structures	3:26	Denton, P. E.: The technology of compression machines	10:23	Simpson, J. W.: Explosive testing of fibre-reinforced cement composites	4:28
A reprieve for Weavers' Mill	3:20	Fattuhi, N. I.: Flexural testing of fibre-reinforced cement paste beams	6:23	Smith, Dr I. A.: Rectangular columns to CP110	7:29
Role of the ACT	12:27	Fisher, J. M.: Repair of damaged reinforced concrete structures	3:26	Stephen, Peter G.: Design for a precast column connection	11:14
Rope finish at Ashford	8:36	Fookes, Peter: A plain man's guide to cracking in the Middle East	9:20	Sutherland, R. J. M.: Wilkinson and reinforced concrete	7:22
Safety in shear—CP114 and 110	10:31	Cracking in the Middle East	2:14	Swannell, Pat: Concrete to catch the eye	12:26
Safety structural—CS Working Party Report	8:21	Forder, Colin: The evolving concrete block	5:34	Thomas, Gordon R.: Caistor Viaduct—an elegant lost cause	11:18
Sawing a giant concrete mural	8:39	Francis, Ken: Accelerated testing to determine compliance	12:16	Thon, Dale: COD concrete	6:18
Sculpture in a big way	4:20	French, W. J.: Alkali aggregate resistance in the Middle East	1:18	Tam Chat, Tim: Compacting factor: a new test	5:27
Shear, safety in—CP114 and 110	10:31	Green, J. Keith: Some aids to the assessment of fire damage	1:14	Taylor, Ron: Composite reinforced concrete	8:23
Short-term deflections of beams—a new approach to calculations	3:33	Harper, Roger: Concrete's battle for London, 1867-1886	10:28	Strengthening of reinforced and prestressed beams	12:28
A simple test of fracture toughness	4:25	Hobden, Paul: Weathering in Japan	3:32	Walford, Doreen: Concrete on the Liskeard by Pass	5:22
Site Practice Award—Men of good practice	3:25	Hughes, B. P.: Flexural testing of fibre-reinforced cement paste beams	6:23	Wallis, D. F.: Rope finish at Ashford	8:36
A softer sell for concrete	8:38	Kubik, L. A.: Half-castella composite beams construction	9:34		
Some aids to the assessment of fire damage	1:14	Kubik, M. L.: Half-castella composite beams construction	9:34		
Standard box culverts	8:32	Jefferson, Bryan: Glimpse of another world	5:14		
Strengthening of reinforced and prestressed beams	12:28	Jones, Glyn: Design charts for reinforced concrete corbels	6:28		
Structural safety	8:21	McBeth, D. G.: François Hennebique—the 'ferro-concrete' man	5:18		
Superplasticising concrete: the flow that fills	11:14	Maddison, M.: Up and away for weightlifters	8:25		
Surface effects with gunite	3:14	A double at Dover	10:14		
Tall's testimonial	9:24	Manning, G. P.: A very fine work	6:31		
Tanker—LNG—a new concept	11:22	Marriner, Dr Sheila: Life and death of the Economic Building Corporation	4:14		
The technology of compression machines	10:23	Mohamedbhai, G. T. G.: Short-term deflections of beams: a new approach to calculations	3:33		
Temperature matching curing bath—an aid to earlier formwork striking	5:25	Neville, Adam: A concrete message to China	5:14		
Testing—accelerated—to determine compliance	12:16	Neville, Mary: With seven men through China	5:14		
Tunnel segment joints—deformable expanded-polystyrene concrete for	1:28	Nissen, Jorgen: Putting the bridge in the picture	7:26		
Underpinning system in Romano-British corn dryer removal	10:18	O'Driscoll, Patricia: The case of concrete coasters	8:17		
Up and away for weightlifters?	8:25	Patten, Jane: Gardens on concrete slabs	6:14		
A very fine work	6:32	Poole, A. B.: Alkali-aggregate reactions in the Middle East	1:18		
Viaduct—A double at Dover	10:14	Porter, F. C.: Reinforced concrete in Bermuda	8:29		
Weathering 'honours' list	1:22	Pryke, John F. S.: Underpinning system in Romano-British corn dryer removal	10:18		
Weathering in Japan	3:32	Rackham, C. A.: The FCS and its aims	5:35		
Weaver's Mill—a reprieve for Wilkinson and reinforced concrete	3:20	Raoof, Z. A.: Explosive testing of fibre-reinforced cement composites	4:28		
Windloading—behaviour of non-loadbearing walls under	7:22	Rayner, A. R.: Formwork, plywood and efficiency	2:32		
With seven men through China	9:27	Reeves, P. L.: The need to communicate with the Government	9:27		
World's largest prestressed barge	5:14				
	6:17

8:28, 9:19, 10:21, 11:23, 12:18.

Historic concrete features

A bridge for £479	4:24
Calstock Viaduct—an elegant	
lost cause	11:18
Century-old concrete house at	
Caterham	1:26
Concrete's battle for London,	
1867-1886	10:28
Francois Hennebique—	
the ferro-concrete man	5:18
The mystery of the Marquis	12:21
The mystery of Pendley Manor	12:21
A reprieve for Weavers Mill	3:20
Tall's testimonial	9:24
Life and death of the Economic	
Building Corporation	4:14
Wilkinson and reinforced concrete	7:23

Not quite concrete

1:25, 2:29, 3:24, 4:22, 5:24, 7:25, 9:23,
11:27.

Meetings and symposia

1975 Award Dinner address	1:42	1:36, 2:39, 3:39, 4:36, 6:41, 8:39, 9:46,
Complying with CP110—		12:30.
statistical implications of section 6	3:29	
Concrete in conservation	6:31	
Engineers—necessity or luxury	3:29	
Fire resistance	1:31	
First ready mixed concrete conference	1:27	
Legal and professional problems	12:25	1:34, 2:41, 4:36, 5:30, 6:41, 7:34, 8:46,
Materials research seminar 1976	12:24	12:30.
Middle East Problems	11:16	
Superplasticizers discussed	4:23	

A look at literature

1:36, 2:39, 3:39, 4:36, 6:41, 8:39, 9:46,
12:30.

Spotlight

1:34, 2:41, 4:36, 5:30, 6:41, 7:34, 8:46,
12:30.

People on their way

1:34, 2:39.

Current practice sheets

Accelerated strength testing	10:35	A chance to meet . . .
Cracking—design and detailing considerations	6:45	
Creep—Part 1	4:39	
Creep—Part 2	5:37	
Large pours for reinforced concrete structures	3:41	
Large pours—Heat generation and control—Part 2	12:33	Editor's comment
Portland cements	7:37	
Superplasticised concrete	9:36	1:3, 2:3, 3:3, 4:3, 5:3, 6:3, 7:3, 8:3, 9:3, 10:3, 11:3, 12:3.
